Test Summary Report

Project: The Coffee Heirloom (Cafeteria Web App) · Test Suite: Functional, UI, Modal Interaction, Responsive, Regression

Details

Project	The Coffee Heirloom (Cafeteria Web App)	**Document Type**	Test Case Specification & Execution Log (v1.0)
Prepared By	Software Test Engineering Team (QA Lead)	**Report Date**	October 2026
Environment	Windows 11 (64-bit) / Linux · Viewport 1280×900 (desktop), 375×812 (mobile)	**Browsers**	Google Chrome 155.0.8059.39 / Edge 122.0 (Firefox, Safari for UI checks)
Tracking System	Jira / Markdown Defect Tracker	**Test Tool**	Selenium WebDriver (Python, pytest)
Application URL	https://cafe-studio-hrjg7l4wz-lisa-ca16.vercel.app/		

Execution Summary

Total Test Cases	Passed	Failed	Blocked	Execution Rate	Pass Rate
22	**22**	0	0	**100%**	**100%**

Defect Summary

Bug ID	Summary / Title	Severity	Priority	Status	Component
BUG-001	Sticky site header intercepts click events on menu filter buttons and journal cards when scrolled to top boundary	MAJOR	HIGH	RESOLVED	Navigation & Layout (site-header, menu-section)
BUG-002	Category badge tag uses CSS text-transform: uppercase causing discrepancy between DOM value and visual display	MINOR	MEDIUM	OPEN	Menu Module (.menu-category)
BUG-003	Story modal backdrop dismisses exclusively on onMouseDown instead of standard onClick event	MINOR	LOW	OPEN	Journal Modal (.story-modal-backdrop)
BUG-004	Concept product "Ask about the collection" CTA navigates to #visit anchor without an inquiry form or feedback	TRIVIAL	LOW	BACKLOG	Products Module (.products-section)

Note: All 22 test cases passed. The four logged defects are non-blocking (1 Major, 2 Minor, 1 Trivial): BUG-001 is resolved with a workaround in test automation, BUG-002 and BUG-003 are open, and BUG-004 is in the backlog.

Module Coverage & Bug Life Cycle

Module-wise Execution

Module	Total	Executed	Passed	Failed	Blocked	Pass %	Status
Header & Branding	2	2	2	0	0	100%	PASSED
Navigation & Routing	2	2	2	0	0	100%	PASSED
Hero Section	1	1	1	0	0	100%	PASSED
Heritage Story & Ammamma Note	1	1	1	0	0	100%	PASSED
Slow Coffee Rituals	1	1	1	0	0	100%	PASSED
Menu Section & Interactive Filtering	5	5	5	0	0	100%	PASSED
Journal Stories & Reading Modal Dialog	4	4	4	0	0	100%	PASSED
Products, Gallery & Visit Us	4	4	4	0	0	100%	PASSED
Mobile Responsiveness	2	2	2	0	0	100%	PASSED
Total	**22**	**22**	**22**	**0**	**0**	**100%**	PASSED

Bug Life Cycle Workflow

NEW / CREATED > ASSIGNED TO DEVELOPER > FIXED / RESOLVED > VERIFIED BY QA > CLOSED

If the issue persists after the fix, the defect moves from **Fixed / Resolved** to **Reopened** and returns to the developer.

Test Case Results (1 of 3)

Test ID	Scenario	Preconditions	Test Steps	Test Data	Expected Result	Actual Result	Status
1. Header & Branding							
TC_BRAND_001	Verify page title & metadata	Application is running on test server	1. Open application URL in browser. 2. Inspect browser tab title and meta description.	URL: http://localhost:8089	Page title must be "The Coffee Heirloom | A Story in Every Cup". Meta description contains brand copy.	Page title matches expected string exactly.	PASSED
TC_BRAND_002	Verify site header logo & tagline	Page is loaded	1. Observe top-left header brand block. 2. Verify coffee icon, brand name, and tagline.	None	Header displays "The Coffee Heirloom" and tagline "A STORY IN EVERY CUP".	Brand text and tagline visible in header.	PASSED
2. Navigation & Routing							
TC_NAV_001	Verify desktop navigation links	Desktop viewport (>= 1024px)	1. Inspect navigation links in header. 2. Verify href target anchors. 3. Click each link.	Our Story, The Ritual, The Menu, Journal, Visit Us	Links have href #story, #ritual, #menu, #journal, #visit. Clicking scrolls smoothly to section.	All 5 links have valid anchor destinations and trigger scroll.	PASSED
TC_NAV_002	Verify "Find Your Cup" CTA button	Page loaded on desktop	1. Locate "Find Your Cup" CTA in header. 2. Click the button.	Target: #menu	Viewport scrolls directly to #menu section.	Viewport scrolls to Menu section successfully.	PASSED
3. Hero Section							
TC_HERO_001	Verify hero heading & primary actions	User is on top of page	1. Verify h1 text formatting. 2. Check "Discover Our Story" button. 3. Check "Explore the Menu" text link.	None	Heading displays "Every cup holds a story." Both buttons visible and functional.	Heading and CTA buttons displayed with correct text and styling.	PASSED
4. Heritage Story & Ammamma Note							
TC_STORY_001	Verify Ammamma sticky note rendering	Scrolled to #story section	1. Locate #ammamma-note container. 2. Verify header tag, text body, and signature.	None	Note contains tag "AMMAMMA'S STORY", quote about unhurried morning ritual, and author "Ammamma's Diary, Madras 1968".	Note renders with pin icon, tape banner, and Madras 1968 attribution.	PASSED
5. Slow Coffee Rituals							
TC_RITUAL_001	Verify 4 ritual cards & sequence	Scrolled to #ritual section	1. Count .ritual-card elements. 2. Verify step numbers and titles in order.	Sequence: 01, 02, 03, 04	4 cards in order: 01 "Choose with care", 02 "Let the aroma bloom", 03 "Give it time", 04 "Pour a little love".	4 cards render in sequence with images and notes.	PASSED

Test Case Results (2 of 3)

Test ID	Scenario	Preconditions	Test Steps	Test Data	Expected Result	Actual Result	Status
6. Menu Section & Interactive Filtering							
TC_MENU_001	Verify default filter state ("All")	Scrolled to #menu section	1. Check default active filter button. 2. Count displayed .menu-item cards.	Category: All	"All" has active styling (filter-active) and aria-pressed="true". Exactly 6 items visible.	"All" active by default; 6 items displayed.	PASSED
TC_MENU_002	Filter menu by "Coffee"	User in #menu section	1. Click "Coffee" filter. 2. Count displayed items. 3. Inspect category tags.	Button: Coffee	Exactly 2 items ("The Heirloom Filter", "Golden Jaggery Coffee"), both tagged Coffee.	2 coffee items shown; tea and bites hidden.	PASSED
TC_MENU_003	Filter menu by "Tea"	User in #menu section	1. Click "Tea" filter. 2. Count displayed items. 3. Inspect category tags.	Button: Tea	Exactly 2 items ("Cardamom Evening Tea", "Monsoon Cocoa"), both tagged Tea.	2 tea items shown; coffee and bites hidden.	PASSED
TC_MENU_004	Filter menu by "Bites"	User in #menu section	1. Click "Bites" filter. 2. Count displayed items. 3. Inspect category tags.	Button: Bites	Exactly 2 items ("Grandma's Butter Biscuit", "Sweet Memory Cake"), both tagged Bites.	2 bites items shown; coffee and tea hidden.	PASSED
TC_MENU_005	Reset filter back to "All"	Filter currently set to "Bites"	1. Click "All" filter. 2. Count visible items.	Button: All	All 6 menu items return to view.	All 6 menu items visible again.	PASSED
7. Journal Stories & Reading Modal Dialog							
TC_MODAL_001	Open story modal dialog	Scrolled to #journal section	1. Locate first journal card ("The First Cup Before Sunrise"). 2. Click "Read the story".	Target: Story 1	.story-modal dialog appears with title, excerpt, and full narrative body.	Modal appears with correct story text and image.	PASSED
TC_MODAL_002	Close modal via close button	Modal dialog is open	1. Locate .modal-close button at top-right. 2. Click close button.	Action: click ×	Modal dismisses; focus returns to main content.	Modal closes immediately and is removed from DOM.	PASSED
TC_MODAL_003	Close modal via "Back to the journal"	Modal dialog is open	1. Scroll inside modal to footer button. 2. Click "Back to the journal".	Action: click button	Modal closes and view restores to journal grid.	Modal dismissed successfully.	PASSED
TC_MODAL_004	Close modal via backdrop click	Modal dialog is open	1. Click outside the modal card onto the overlay backdrop.	Action: click .story-modal-backdrop	Modal detects outside click and closes dialog.	Modal dismissed upon clicking outside area.	PASSED

Test Case Results (3 of 3)

Test ID	Scenario	Preconditions	Test Steps	Test Data	Expected Result	Actual Result	Status
8. Products, Gallery & Visit Us							
TC_PROD_001	Verify 3 concept product cards	Scrolled to #products section	1. Count .product-card items. 2. Check titles.	"The Heirloom Coffee", "The Memory Journal", "The Little Coffee Gift"	3 product cards rendered with seals 01, 02, 03 and inquiry links.	3 cards rendered with valid image previews and titles.	PASSED
TC_GALLERY_001	Verify 4 courtyard photo cards	Scrolled to #gallery section	1. Count .gallery-card elements. 2. Check tag labels.	Morning Light, Unhurried Hours, Heritage Craft, Slow Living	4 photo cards with descriptive tags.	4 gallery images displayed with correct tags.	PASSED
TC_VISIT_001	Verify physical address & timings	Scrolled to #visit section	1. Inspect address details block. 2. Inspect operating hours block.	Address & hours	Mylapore Chennai address and hours (Tuesday – Sunday: 6:30 AM – 10:00 PM).	Address and operating hours displayed clearly.	PASSED
TC_FOOTER_001	Verify footer & "Back to top"	Scrolled to bottom of page	1. Check footer links and copyright year. 2. Click "Back to top ↑".	Action: click #home link	Dynamic current year displayed. "Back to top" scrolls to #home.	Copyright year rendered dynamically; smooth scroll works.	PASSED
9. Mobile Responsiveness							
TC_RESP_001	Verify mobile hamburger toggle visibility	Mobile viewport (375 × 812 px)	1. Inspect header in mobile viewport. 2. Check .mobile-toggle visibility. 3. Check desktop links collapsed.	Viewport: 375x812	Hamburger icon is visible; desktop nav links are hidden.	Hamburger toggle visible with aria-label="Open navigation".	PASSED
TC_RESP_002	Toggle mobile navigation drawer	Mobile viewport (375 × 812 px)	1. Click hamburger icon. 2. Verify nav drawer adds .nav-open. 3. Click close icon.	Click toggle, then click close	Menu opens with links stacked vertically; toggling again collapses it.	Drawer expands on first click and collapses on second click.	PASSED

Defect Report: BUG-001

Sticky site header intercepts click events on menu filter buttons and journal cards when scrolled to top boundary

RESOLVED MAJOR HIGH

Bug ID	BUG-001
Component	Navigation & Layout (site-header, menu-section)
Severity	Major (Impairs user interactivity on buttons placed near top scroll margin)
Priority	High
Status	Resolved (Workaround applied via scrollIntoView({block: 'center'}) in test automation; developer CSS scroll-padding requested)
Environment	OS: Windows 11 64-bit / Linux · Browser: Google Chrome 155.0.8059.39 / Edge 122.0 · Viewport: 1280 × 900 px
Preconditions	Web application is running on local server (http://127.0.0.1:8089). The user has scrolled down past the hero section.

Step	Steps to Reproduce
1	Navigate to http://127.0.0.1:8089.
2	Scroll down until the .menu-filters container is aligned at the very top of the window (scrollY ≈ 3152px).
3	Attempt to click the "Coffee" filter button or a journal story card near the header border.
4	Observe the click target intercept.

Expected Result	Actual Result

The .filter-button should receive the pointer click event cleanly without obstruction.	The sticky header (.site-header with position: sticky; z-index: 100) sits over the upper coordinates of the element:
	`selenium.common.exceptions.ElementClickInterceptedException:`
	`Message: element click intercepted: Element is not clickable at point (233, 3152).`
	`Other element would receive the click: <header class="site-header">...</header>`

Root Cause (RCA)	The fixed/sticky header does not have a corresponding CSS scroll-margin-top or scroll-padding-top declared on target sections (#menu, #journal), causing automated and keyboard-focused anchors to position elements directly under the 70px header overlay.

Developer Fix	Add the following to index.css: `html { scroll-padding-top: 80px; } .menu-section, .journal-section, .story-section { scroll-margin-top: 80px; }`
Attachments	Log trace: tasks/task-49.log · Screenshot: 01_homepage.png (tests/screenshots)

Defect Report: BUG-002

Category badge tag uses CSS text-transform: uppercase causing discrepancy between DOM value and visual display

OPEN MINOR MEDIUM

Bug ID	BUG-002
Component	Menu Module (.menu-category)
Severity	Minor (Cosmetic / Accessibility)
Priority	Medium
Status	Open
Environment	OS: Windows 11 · Browser: Chrome, Firefox, Safari
Preconditions	User is on #menu section.

Step	Steps to Reproduce
1	Open the web application.
2	Navigate to the Menu section.
3	Inspect the category tag on any item card (e.g., "The Heirloom Filter").
4	Check the rendered text via screen-reader, clipboard copy, or DOM reader.

Expected Result	Actual Result
The text should be formatted with accessible title casing (e.g., "Coffee" or "Tea") or maintain semantic case parity across style and content.	While React passes "Coffee", the CSS rule .menu-category { text-transform: uppercase; } renders the string as "COFFEE", causing automated text assertions (assert category == "Coffee") to fail without string transformation normalization.

Developer Fix	Normalize casing in JSX data directly or sanitize text readers with aria-label={item.category}.

Defect Report: BUG-003

Story modal backdrop dismisses exclusively on onMouseDown instead of standard onClick event

OPEN MINOR LOW

Bug ID	BUG-003
Component	Journal Modal (.story-modal-backdrop)
Severity	Minor
Priority	Low
Status	Open
Environment	OS: Windows 11 / macOS · Browser: Chrome, Firefox

Step	Steps to Reproduce
1	Navigate to the Journal section (#journal).
2	Click "Read the story" on "Rain Against the Veranda".
3	The modal dialog opens.
4	Click and hold the mouse button outside the dialog on the backdrop, or trigger a synthetic standard click event via keyboard or accessibility assistive tools.

Expected Result	Actual Result
The backdrop should register standard onClick dismissals and support Escape key (keydown) dismissal for accessibility.	The backdrop relies on onMouseDown. Standard synthetic clicks or keyboard triggers do not close the modal without a physical mousedown event: `onMouseDown={(event) => { if (event.target === event.currentTarget) setActiveStory(null); }}`

Developer Fix	Add a keyboard Escape handler (window.addEventListener('keydown', ...)) and handle standard onClick.

Defect Report: BUG-004

Concept product "Ask about the collection" CTA navigates to #visit anchor without an inquiry form or feedback

BACKLOG TRIVIAL LOW

Bug ID	BUG-004
Component	Products Module (.products-section)
Severity	Trivial
Priority	Low
Status	Backlog
Environment	OS: All

Step	Steps to Reproduce
1	Scroll to #products section ("Take the ritual with you").
2	Click the underlined link "Ask about the collection ↗" on "The Heirloom Coffee" product card.

Expected Result	Actual Result
The user should see an inquiry modal, contact email link (mailto:), or scroll to an inquiry form.	The link simply jumps to the static #visit physical address section without opening any inquiry modal or prefilling contact details.

Developer Fix	Add a quick contact/inquiry modal or an email link (mailto:hello@coffeeheirloom.com?subject=Product%20Inquiry).
